Messaging

Talking about Gemma

Approved messaging

Gemma is a family of lightweight, state-of-the-art open models from Google, built from the same research and technology used to create the Gemini models.

Gemma messaging framework

Positioning

Gemma is a family of lightweight, state-of-the-art open models built from the same research and technology used to create the Gemini models

Value proposition

Best-in-class open models for easy tuning, responsible development, and community-driven innovation

Proof points

Responsible by design

Incorporating comprehensive safety measures, these models help ensure Responsible and trustworthy AI solutions through curated datasets and rigorous tuning.

Unmatched performance at size

Gemma models achieve exceptional benchmark results at its sizes, even outperforming some larger open models.

Extensibility and optimization

TPU and GPU optimized, multi-framework support, seamless device compatibility, and model customization empower AI development.

Community-driven innovation

Open access to models, world-class partners, and extensive ecosystem fosters collaboration and AI advancements.

Naming

Talking about Gemma

General guidelines

OK

Referring to the models as
“Gemma” or “Gemma models
from Google”

OK

Gemma is always capitalized in copy,
and never plural, e.g.,
“We use Gemma”

*Note: Gemma can be lowercase in code.

OK

Referring to Gemma models as open,
e.g., “Gemma is a family of open
models from Google”

Why we don’t use “[open source](#)”

OK

Referring to Gemma models as a close
relative of Gemini models, e.g.,
“Gemma is built from the same
research and technology used to
create the Gemini models.”

OK

Referring to technology as “built on” or
“based on” the specific Gemma model,
e.g., “ModelName is built on Gemma 3
27B”

External messaging

General guidelines for when you are talking about Gemma:

 Not OK

Including "Gemma" in your model name, e.g., "YourcompanyGemma" or "GemmaVariantname"

 Not OK

Using "open source":
"Gemma is an open-source model from Google"

 Not OK

Appearing to be an official Google product

Gemma model variant naming & attribution

Naming guidelines

We appreciate you sharing your models with the open community!

When naming your Gemma model variant, we encourage you to create your own brand. Do not use “Gemma” as part of your model name. This helps your project get the recognition it deserves, and prevents confusion about whether the model comes from Google’s Gemma team.

Examples we love from the community: Navarasa, OmniAudio, Octopus v2

For model names, we’d also appreciate it if you include “gemma” after your model’s name in model’s repository path or description for discoverability. This is completely optional, but highly encouraged.

Example:

- ✓ Model path: “modelname-gemma-3-27b”

Attribution

To ensure clarity and avoid confusion please (1) always include trademark attribution statement when referring to Gemma (“Gemma is a trademark of Google LLC.”) and (2) keep the Gemma name separate from your company or model name.

Examples:

- ✓ “ModelName is built on Gemma 3 27B”
- ✓ “CompanyName’s ModelName is based on Gemma 3 27B”

Branding

Do not incorporate Gemma brand features (e.g. the Gemma spark icon, blue gradient), in your own branding. Follow the [co-branding](#) guidelines instead.

Gemma

Usage

Misuse

Don't alter the color of the Gemma wordmark or variant

~~PaliGemma~~

Don't stack the type to make a new lockup

~~Pali
Gemma~~

Don't create new logo lockups for variants

Clearance

To preserve the visual integrity of the Gemma Logo, always maintain adequate space around it.

The clear space around the logo is an integral part of its design, and ensures that the logo can be seen quickly and uncluttered by other images, symbols or text.

Co-branding

Logos should feel equal and balanced when used side by side. keep the surrounding whitespace clear as defined in the images on the right.
